Ex-Alderman Francis McCabe, who has been deslared insane by a jury, was committed yesterday to the custody of his wife. District-Attorney Martine went before Judge Cowing in the morning by appointment with McCape's lawyers to have the question of McCabe's place of residence disposed of. Richard S. Newcombe and W. F. Hume represented McCabe Neither McCabe nor his wife was present.

Mr. Martine asked that McCabe be committed to an asylum for the insane. He said that he would not specify any asylum; but would ask the Court to name

McCabe did not suffer from any such form of insanity. His mental disease, as the physicians testined, would be a progressive one, and he would sink into a weak and irresponsible state. He needed the attention and care which he could only receive at home. The lawyer asked that McCabe be poumitted to his wife's care under a reasonable appeared to half.

Mr. Martine said that the physicians did not agree that there was no possibility that McCabe would become dangerous to society. Some of them thought that he might become so atter a time.

Judge Cowing said that Mrs. McCabe had called apon him and had asked that if her husband was not sent to an asylum he should be committed to her care. He had considered the matter and believed that it would be best to allow the defendant to remain with his wife. At the same time bail in a reasonable amount must be given, as the defendant might recover his reason. GETTING READY TO TRY MCQUADE. Recorder Smyth directed that an extra panel of 200 jurors be drawn yesterday in the Court of General Sessions, in preparation for the trial of Arthur J. McQuade, which is to begin next week. Considerable difficulty is expected in obtaining a jury, and it is considered certain that the present panel of the Court will be insufficient. The Recorder was busily occupied in the trial of cases so that the Commissioner of Jurors made the drawing at the court. Chief Clerk John Sparks was present. The 200 names which were drawn include a large number of reputable business men. The names will be scrutinized by the District-Attorney and by the counsel for the defence. Recover Smyth, when a lawyer applied to him to postpone a case then on the calendar, intimated that he expected that the time of the Court for the remainder of the term would be occupied in the hearing of bribery cases. The Grand Jury adjourned to Tuesday.

LIFE HAPPY. BUT HE CAN'T BE FOUND. It is thirteen days since Edward Payson Fox walked out of the store of Comey & Co., No. 577 Broadway, in whose employ he had been for thirteen years, and neither his family nor his employers have been able to find any trace of him since. Mr. Fox was the sonfidential bookkeeper, correspondent and salesman of Comey & Co., and on November 1 went to the store as was his custom about 9 a.m. He opened the safe, read the mail, wrote a postal card to his mother, who lives in Maine, and then without putting on his overcoa went out of the store without saying a word. There was nothing singular about this, for he was not accusomed to give explanations of his comings in or goings

out, unless he was to be gone an unusually long time. As he did not return that day, great alarm was felt for his safety, and the store was kept open for an hour later than usual, and then Superintendent Murray was com-municated with. A strict inquiry at all the police stations and hospitals failed to reveal where the missing man was. A thorough inspection of the books of

MR. BEECHER DECLINES A RECEPTION.

A LETTER TO MAYOR WHITNEY EXPRESSING HIS APPRECIATION OF THE OFFER.

Mayor Whitney's statement that the city's money could not be appropriated to defray the expenses of the proposed reception to Mr. Beecher has defeated the pinn of thus honoring the preacher's return. The Mayor appears to have forgotten that he approved without question the expending of nearly \$3,000 for the part taken by the city officials in the unveiling of the Barthoidi Statue. Mr. Beecher called at the Mayor's office yesterday and delivered a letter declining the pro-posed reception on personal grounds. In the letter, which is addressed to Mayor Whitney, he says:

posed reception on personal grounds. In the letter, which is addressed to Mayor Whitney, he says:

I have received through you the resolutions passed by the municipal government of Brocklyn offering me a public reception, that "the citizens of Brocklyn without distinction of party or creed, may show how they hold their distinction of party or creed, may show how they hold their distinguished and beloved follow-citizen." I should be without sensibility if I were not profounly affected by the great honor which this action of the numicipal government of this great city, the third in population in the United States, confers upon me. The offer is itself an honor which no public reception could increase, and I am constrained to decline the public meeting with most grateful recognition of the kindness which proferred it. Brooklyn is in population the thirdely in the United States, and in its schools, churches, libraries and its social and literary institutions not behind any great city of our land. It has come to its great importance within the forty years of my residence in it.

It is a matter of profound satisfaction to me that I am offered a guelle expression of the confidence and affection of my fellow-citizens, who have known my life and labors during the evolution of the past fifty years. In respectfully declining the public meeting from reasons personal to myself. I beg that you will convey to the Common Council my sincere thanks for the great honor which they have conferred upon me. May I be great the one which they have conferred upon me. May I be great the one which they have conferred upon me. May I be great though one promised to ask that the resolutions and signatures of all that have taken part in this, to me, memorable transaction, may be smitably engrossed in such a form as that they may be transaction of the conference.

The Mayor expressed his regret at Mr. Beecher's decision. The paster was against the professed against.

The Mayor expressed his regret at Mr. Beecher's de-faion. There was some indignation expressed against fr. Whitney for defeating the proposed tribute to Mr. leacher.

Collector Magone has been often criticised for his sudden, if not too hasty, action in removing employes in the Custom House for seeming violations of the revenue laws, the regulations, or the rules of the service, and if every removal by him created an actual vacancy, there would be plenty of places for the "hungry and thirsty." Nathan R. Howell, an old and ient clerk of many years' experience in the Pitth Division is the last victim of Mr. Magone's strict discipline. Mr. Howell is a brother in-law of ex-Senator Sixby, and is chief clerk under Deputy Collector Davis. Mr. Magone called the latter before him yesterday morning in relation to the approval of supplementary manifests of cargoes, which has been a bone of contention between the Collector and the steamship people for the last few days.

HARVARD DID NOT SNUB DR. M'COSH.

BUT IT IS ALLEGED THAT HE SHOOK THE DUST OF CAMBRIDGE FROM HIS FEET.

BOSTON, Nov. 12 (Special). - The Evening Transcript says: "A very amusing thing occurred at Cambridge on Monday. Among the distinguished representatives from other colleges present at the Harvard celebration was the Rev. Dr. McCosh, of Princeton. When President Eliot read the list of honorary degree Dr. McCosh was not a little surprised to find that his name, and therefore his college, did not appear. He was naturally incignant. It was a snub to himself and to the college which he had the honor to represent. He would show that he felt this insult deeply; that he was and without waiting for dinner proceeded to the house of Mr. Peabody, with whom he had been staying, packed his value, shook the dust of Cambridge from his feet and left it with a vow never to see it again. Upon reaching home the Doctor discovered that he had been made au LL D. by Harvard in 1866."

NORTH CAROLINA POLITICS. SOME OF THE GRATIFYING RESULTS OF THE LATE

ASHEVILLE, N. C., Nov. 9.—Permit me to give you a short account of a "Fox race" that lately took place in old Buncombe County, the land of the sky. the home of Bob and Zeb Vance. Buncombs and Madison Counties jointly elect a State Senator. Buncombe generally gives a Democratic majority of 800, Madison a Republican majority of 400, so that together they have always gone Democratic by about 400. One Republican candidate for the Senate at the last election was J. J. Fox of Buncombe, and, to show how magnificently he ran, it is only necessary to state that he carried Buncombe by 823 and Madison by 400 majority. Total majority, in a Democratic district, 1,223. rah for Fox! Nor was the political revolution in Buncombe confined to the Senatorship. For the last fifteen years the Democrats have elected their county ticket by majorities ranging from 400 to 1,200. But this year Weils, a straight-out Republican candidate for the Legislature, has 1,143 majority, and Richmond Pearson, who ran as an Independent for the same office, 1,288 majority. The Republicana also elected their candidates for Sheriff, Treasurer, Register and Judge by majorities ranging from 982 to 200. Is it any wooder that a study of these figures greatly depresses the Democracy hereabouts? Let me add, before I forget to, that the Republicans also elect the State Solicitor for this district (recounties) by 2,000 majority—a change of about 4,000 votes in two rears. Pearson, who developed such great strength in his canvass for the Legislature and who has the making of a sugacious and successful political leader, is a son of Chief Justice Pearson and the brotherin-law of Rev. Dr. Curry, our Minister to Spain.

Speaking senerally, the reason why there have been such Republican gains throughout the State are the advancement of protection deas, the organization of the labor element and the disgust of the rank and file of the Democracy of North Carolina with those who assume to lead them, but nevertheless are hopelessly weided to free trade and the Bourhon idea of "ruing families." lature, has 1,143 majority, and Richmond Pearson, who

White in Brooklyn came to light yesterday in the official canvass by the Board of Supervisors. In the Eleventh election district of the Ninetecoth Ward the unofficial returns gave White 212 and B-il 180. These figures were written out in words in the official returns on the outside of the sheet, as required by law, but in the numerals on the inside the figures had been changed to 1.2 for White and 280 for Bell. If this had been correct Mr. White's plurality of 174 would have been elected. But the work, if a fraud was designed, was that of a bundler, for the figures as written on the returns were canvassed as correct, leaving Mr. White's plurality musitered. The canvass will be completed today. man over S. V. White in Brooklyn came to light yes

FINISHING THE CITY CANVASS.

The Board of County Canvassers finished the canvass yesterday. Only the XXIId and XXIIId Districts remain to be gone over. The time consumed in canvassing the returns was the quickest on record. There was not a single contest—a thing almost unprecedented. The inspectors of ten of the election districts of the XIIIth Assembly District were sent for to explain the twenty-seven defective Assembly ballots, which it had been alleged by some persons should have been counted for ex-senator Frederick's Gibbs. The inspectors explained that in some cases the name had been scratched off, leaving only the caption. In others Mr. Gibbs's name was scratched and in its place "wild Cat," "Jumpo" and other reliculous names were substituted. The majority of 76 for William P. Mulry was not disturbed. The Board took a recessional 3 p. m. to-day, when the result of the canvass will be officially declared. canvassing the returns was the quickest on record.

A FORECAST OF WINTER

From The New Haven Pulladium.

We accordingly predict-and we don't care who knows it—that there will be an area of depressed thermometer extending over the entire North and West, between December 15 and February 28. It will be accompanied by severe snow-storms in Maine and Dakota, and probably in many other States, ice will form, and there will be a great increase in the price of that pleasant article of consumption, in accordance with the beautiful law of political economy when reads: "The more ice there is, the more it costs." Railroads will be blockaded, and country roads will be filed so full of snow as to require travellers to take to the fields in many cases in order to get along. Several people will die of cold and exposure in Northern Dakota, who might save their lives if they would heed this prediction and emigrate, now, to Ceylon. Moreover, we predict, reckless as it may seem, that the winter of 1886'87 will be shorter than that of 1887'88 will be—one whole day shorter. Furthermore, we prophecy that Christmas will come on December 25, and the Fourth of July on July 4.

THE BLANK WAS PILLED UP, ANYHOW.

THE BLANK WAS FILLED UP, ANYHOW.

From The Chicago Nets.

Superintendent Judson, of the Chicago and Iowa road tells of a section hose who several years ago sent in a report which made a by word for the boys about the general office that is in use to-day. Section bosses are provided with blanks, on which they are required to report all cases of animals killed by trains. The blanks have spaces for telling where, when and how the animal is killed, and whrit disposition is made of the carcass, whether it is buried or sold.

Une day a cow was killed out on the Rochelle section, and a section boss who had been recently promoted went out to make the report. He told in the proper spaces what train killed the animal and under what conditions it was done. Then he came to the line:

"Disposition" which scratching his head, "I'll be danged if I'm sure about that, but being's she was a cow I think I can guess at it" so he filled out the line, which, when it reached the general office, read: "Disposition, kind and gentie."

Two new branches have been added, pedagogics, taught by Professor West, and archmology, a complement to nal research in science, in philosophy, and philology, and a considerable amount of hard study among the great body of the students. A number take the severest studies. Thus no fewer than forty-three out of the small senior class take metaphysics, not usually reckoned an

attractive study.

THE STORE OF HUMAN HAPPINESS INCREASED.

THE New-York Tribune indulges in permissible pride over the success that attended its fresh-air fund during the warm season how past. The number of children who have been sent into the country for a fortnight's vacation is correspondingly large-6.336. Nearly 9.000 poor children made happy and healthy!

The (TRIBUNE'S) fresh air charity is one of the most beneficent claiming public attention, and while many individuals contribute to it, none will galasay that THE TRIBUNE deserves the highest praise for its careful and wise management of the fund.

A vast amount of happiness was the result of the expenditure of THE Tanburs's Fresh Air Fund last summer.

Every person who contributed to it did unto each of the little ones thus favored that which will always be a bright spot in their memories. It is a simple but noble charity, and THE TRIBUSE is entitled to great credit.
